DEPARTMENT OF WILDLIFE AND FISHERIES
OFFICE OF SECRETARY

ROBERT J. BARHAM
SECRETARY

Louisiana Natural & Scenic River System **SCENIC RIVER PERMIT #869**

Issue/Effective Date: June 20, 2013

Scenic River: Bayou Manchac

Recipient: Sonia Godoy
8739 Glenfield Drive
Baton Rouge, LA 70809

Description: Installation of a Culvert to Provide Access to Lot

This permit is issued by authority of Part II of Chapter 8, Title 56 of the LRS of 1950 as amended and re-enacted regarding the Louisiana Natural & Scenic Rivers System and the administrative procedures pertaining to the management of these watercourses designated as Scenic Rivers.

The permit is issued by the Administrator with the understanding that the recipient in implementation of the proposal will proceed in compliance with, and not significantly deviate from the provisions contained in the petition for the permit and any special conditions attached hereto. The permit holder is expected to minimize adverse impacts to the structural and functional integrity of the natural systems and aesthetics associated with the Scenic River where the activity is occurring so as to preserve the fundamental character and purpose for which the System was established.

The Administrator assumes no responsibility for or incurs no liability for any injury to persons or property caused by any act of the permit holder or his agent in the permission granted by this permit. In addition to the Department of Wildlife & Fisheries, the petition was given a full and thorough evaluation by the Louisiana Departments of Agriculture & Forestry; Culture, Recreation & Tourism; Environmental Quality; and the Office of State Planning and Budget. If during the review process objections were made to the proposed activity, those objections were either found to be insignificant or they have been included in the conditions of the permit.

This permit shall expire if the permitted activity has not begun within 18 months of the "Issue Date" indicated above.

Compliance with these conditions is necessary for this permit to be valid:

- 1) This project must be carried out in a manner consistent with the design that the applicant submitted during the permit process. Should significant physical modification to the project become necessary during implementation of the project or after its completion, the permit holder will submit a letter of explanation within one week of discovery to the Administrator to determine if another petition will be required.
- 2) Adequate erosion control measures shall be implemented and maintained to insure that no sediments, pollutants, and/or construction related debris/materials are allowed to enter Bayou Manchac, whether directly or indirectly, as a result of this construction.

Prior to the placement of fill material, the applicant shall install and maintain sediment containment features such as silt fencing and/or straw bale barriers along the entire perimeter of the proposed footprint of fill.

Immediately upon completion of fill placement activities, the applicant shall place sod, seed, or another acceptable method, as necessary, to restore cover and prevent erosion. Once the fill area has become fully vegetated, the sediment containment features can be removed.

- 3) If during project activity, any sensitive archaeological, biological or botanical element is encountered, activity will temporarily cease and the permit holder will contact the Administrator to determine the disposition of that element or artifact.
- 4) All other applicable permits not contingent upon this permit from governmental entities will be acquired and their conditions implemented with fidelity. Applicant has title to the property or permission from the landowner to implement the project.
- 5) The proposed culvert shall be regularly maintained to ensure that existing flow of surface water is uncompromised.
- 6) A Right of Way will be required from the Louisiana State Land Office. The contact person there is Clay Carter, (225-342-4600 or Clay.Carter@la.gov).
- 7) The permittee shall allow representatives of the Department of Wildlife and Fisheries to make periodic inspections to ensure the activity being performed is in accordance with the conditions of this permit.

If you need any additional information, you may contact Mr. Keith Casio, Scenic Rivers Coordinator in the Monroe Office, at (318) 343-4045.
